**Presented By Geoff Selvin,
Director of Business
Development, FuelCell Energy**

Geoff is responsible for developing customer-sited and micro-grid projects for FuelCell Energy in the Eastern USA. In this role, he is tasked with originating deals and closing contracts for projects ranging from 1-20 MW.

Previously, Geoff served as the Vice President of BP's Solar division in North America, having had full P&L responsibility for all market development, sales, engineering, business development, project development and customer service for the business. His prior BP experience includes work in jet fuel sales as well as energy management and engineering roles for BP's West Coast refining operations. After BP, Geoff acted as the General Manager for Carlisle

Energy Services, Vice President of LG's Solar Division, and as a Vice President at GridPoint, an energy management startup located in Arlington, VA.

Geoff holds a BS in Chemical Engineering from the University of Notre Dame and an EMBA from the TRIUM program, an alliance of the London School of Economics, NYU Stern, and HEC Paris.
